This action is in response to the application filed 4/16/04.

Reasons for Allowance

1. Claims 5-14 and 20-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 26 contain the limitation where a first fin is formed from a dielectric layer and second and third fins are formed from an amorphous layer and are adjacent the first fin but also on opposite sides of each other. Claim 20 contains the limitation where a first fin is formed from a dielectric layer and second and third fins are formed from a layer of different material from the first fin and are adjacent the first fin but also on opposite sides of each other. This limitation, in combination with the other limitations of claims 1, 20, or 26 is not taught or suggested by the prior art of record.

The closest prior art HSU (US 6,413,802) forms the first fin by patterning a hard mask and etching the device fin structure, but teaches the fin structure to be of the same material, either silicon or re-crystallized amorphous silicon, but not one fin of one material and the other fins of another material. Fried (US 6,657,259) and Nowak (US 6,794,718) teach forming fins at 90 or other angles to each other, but do not teach or suggest that the fins on a substrate may be made of different materials. Wu (US

6,770,516) forms fins on the sides of another fin but does not teach or suggest that the fins on a substrate may be made of different materials.

Claims 6-14 are allowed as being properly dependent upon allowed claim 5.

Claims 21-25 are allowed as being properly dependent upon allowed claim 20.

Claims 27-29 are allowed as being properly dependent upon allowed claim 26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
